

QUALITY POLICY

Bilsa, which operates in the areas of MIM | metal injection molding, machining, and metal processing, produces value-added parts for defense, automotive and industrial use while acting with the awareness of respect for the law, environment, and nature.

It aims to increase its competitive power in the global market and to evaluate the market supply and demand for competing goods and products. We continuously improve our methods by adding new equipment and infrastructure investments.

It supports leadership and teamwork, conducts risk assessments with customers and process-oriented processes, and aims and undertakes continuous improvement.

- * Customer-Oriented
- * Process-Based
- * Error-Free
- * Great Quality
- * Human Priority
- * Compatible with Technological Developments
- * Occupational health and safety, sensitive to environmental issues
- * Continues improvement-oriented that serves with the participation of all employees.
